

Canadian Reference Group

Data Report

Spring 2019

The ACHA-NCHA II supports the health of the campus community by fulfilling the academic mission, supporting short- and long-term healthy behaviors, and gaining a current profile of health trends within the campus community.

Suggested citation for this document: American College Health Association. American College Health Association-National College Health Assessment II: Canadian Reference Group Data Report Spring 2019. Silver Spring, MD: American College Health Association; 2019.

Demographics of Participating Institutions

Fifty-eight Canadian postsecondary institutions self-selected to participate in the Spring 2019 ACHA National College Health Assessment and 55,284 surveys were completed by students on these campuses. For the purpose of forming the Reference Group, only Canadian institutions that surveyed all students or used a random sampling technique are included in the analysis. *All schools collected data via the ACHA-NCHA web survey.*

The mean response was 20% and the median was 19%.

Demographic characteristics of the 58 campuses follow:

Demographical Characteristics of the 58 Postsecondary Institutions Included in the Spring 2019 CANADIAN ACHA-NCHA II Reference Group.	
Campus Characteristic	<i>n</i>
Type of Institution	
Public	52

 FREQUENCY REPORT
 Number of Surveys (n) = 55284 Web Surveys

A note about the use of sex and gender in this report:

Survey responses are reported by sex based on the responses to questions 47a, 47b, and 47c. For the purpose of the ACHA-NCHA report documents, respondents are reported as male or female only when their responses to these three questions are consistent with one another. If students' gender identity is consistent with their sex at birth AND the student selects "no" for transgender, then respondents are designated as either *male* or *female*. If a respondent selects "yes" for transgender OR their sex at birth is not consistent with their gender identity, then they are designated as *non-binary*. A respondent that skips any of the three questions is designated as *unknown*. Only 3 of the 4 categories are displayed in this report. Students categorized as *non-binary* are included in the *Total* column, but are not presented in a separate column. When the *Total* of any given row is higher than the sum of the *male*, *female*, and *unknown* students, the difference can be attributed to *non-binary* students that selected the response option presented in that row.

1. How would you describe your general health?

	Male		Female		Unknown		Total		
	Freq.	Pct.	Freq.	Pct.	Freq.	Pct.	Freq.	Pct.
